

Graduation on Demand

Video Outreach Program for Deployed Soldiers

The dedicated men and women of the US Armed Forces accept many personal sacrifices in the name of serving our country. One such sacrifice is missing out on milestone events back at home like the graduation of a loved one. As an organization founded by and employing veterans, we are intimately aware of the importance of feeling close to home, even while deployed around the world. The employees of LTI DataComm feel that we can give back to our troops by leveraging our expertise in network video delivery. While we cannot bring our soldiers home for graduations, we can bring the graduation to them.

LTI DataComm and VBrick Systems have partnered with high schools across the National Capitol Region to provide an internet portal site where servicemen and women with families graduating from these schools can access an On-Demand video of their ceremony. It is our hope that through this application, the employees of LTI and VBrick can give our troops a little taste of home no matter where they might currently be serving.

How Does it Work?

Participation is easy! The high school will provide a copy of their graduation ceremony to be encoded and posted to the video on demand portal. Users will be able to visit the portal URL, enter a pass code, and search for the high school ceremony they wish to view.

To receive a pass code, please visit www.ltidata.com/graduation and register. You'll receive your pass code within 24 hours to the email you provide. Videos will be available within a few days after they are received from the schools, estimated to be the end of June.

LTI DataComm and VBrick Systems are excited to provide this service to our dedicated servicemen and women and their families. If you have any questions about participation in this program, please visit www.ltidata.com/graduation, or contact one of our program representatives.
